

2016 THERAPY PRICING

PER PERSON

FULL THERAPY	\$275.00
<i>(Allows for a minimum of 35 accrued hours during your current stay)</i>	
ONE HOUR	\$8.00
<i>(Restrictions may apply)</i>	

To determine positive effects a recommendation for the first time visitor is to accrue 3 to 6 hours per day, incrementally, over a 7 to 10 day stay. Therapy results are individual and based upon factors such as severity of symptoms and personal time constraints. Shorter stays have been effective for many. Repeat as needed. **RESTRICTIONS** may apply due to available seating and hours of operation. Please ask if you need other considerations.

WE ACCEPT: Cash, Visa, MasterCard, Discover, American Express, travelers and personal checks (in U.S. funds).

SEASONS AND HOURS

APRIL 1 - OCTOBER 31

OFFICE HOURS: Daily 9 a.m. to 2 p.m.
 UNDERGROUND GALLERY: Daily 9 a.m. to 4 p.m.
 RADON ROOM: 24 hours for registered guests

NOVEMBER 1 - MARCH 31

UNDERGROUND GALLERY: Closed for the winter
 RADON ROOM: by advance reservation only and subject to a minimum "Full Therapy" purchase. No minimum stay required.

*All hours and seasons of operation may be subject to change. Extended hours will be implemented as needed. We reserve the right to refuse entrance to anyone.

Ours is a fragrance-free facility

ON-SITE RV CAMPGROUND

Open early to mid April through mid October as weather allows. Reservations are highly recommended. In order to determine positive effects, a stay of 10 days is recommended, though not mandatory.

3 Full Hookups
 Includes sewer, water and electric with 15, 30 and 50 amps. Reserve in advance.

1-2 adults (inc. tax)	\$20.33/night
-----------------------	---------------

10 Electric Only
 Access to water, 15 amps, inside sanitary facilities, no dump.

1-2 adults (inc. tax)	\$14.98/night
-----------------------	---------------

On-site Rental Unit
 Ten night minimum stay. Two twin beds, fully furnished with linens, utensils, pots and pans, microwave, toaster, coffee pot. Shower, DISH tv, A/C and internet. Deck with two steps, pet with permission. Laundry facility accessible onsite.

1 adult (inc. tax)	\$449.40
2 adults (inc. tax)	\$556.40

Checking In
 Arrive by 4 p.m. to access wi-fi and other services available. Pets allowed, on leash.

OTHER LODGING

Mine Motel (888) 224-1735
 www.minemotel.com
 412 N Main, PO Box 1247, Boulder, MT 59632

OZ Motel (406) 225-3364
 114 N Main, PO Box 257, Boulder, MT 59632

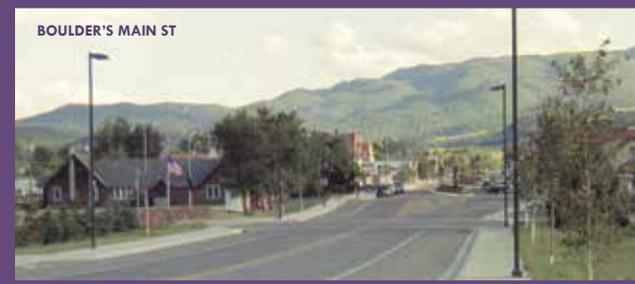

Boulder Hot Springs (406) 225-4339
 www.boulderhotsprings.com
 31 Hot Springs Rd, PO Box 930, Boulder, MT 59632

HOW TO GET HERE

Boulder is midway between Butte and Helena at exit 164 on Interstate 15 (I-15). Both cities have airports.

Rent a car or take a taxi to Boulder. For those without a car, make advance arrangements with your motel for their shuttle service options to/from Boulder.

Amtrak stops in Shelby and may require an overnight stay. Round trip shuttle service to Boulder is offered for a fee. Fare is subject to gasoline prices. Please call us for transportation options.

Once in Boulder, turn west on Second Street at Hardware Hanks. Follow Free Enterprise Mine logo signs to top of hill, two miles from Main Street.

The population of Boulder is about 1300 people. Town businesses include motels, hot springs, diners, thrift store, taverns, library, museum, gas station, hardware store, medical clinic, pharmacy, bank, post office, historic courthouse, grocer, churches, parks, bowling alley and a swimming pool. Weather is mostly dry and moderate. Expect inclement weather at any time of the year.

For a list of summer events, visit the Boulder Area Chamber of Commerce website: www.bouldermtchamber.org

Montana's Original Discovery for Health

Get your life back!

APRIL 1 - OCTOBER 31

THE PROCESS

Therapy at the Free Enterprise Uranium Radon Health Mine is a unique experience. Radon therapy takes place in either an underground "gallery" or at surface in the "radon room" - or a combination of both. The difference is only that which is most comfortable to the individual. Testing confirms radon levels varying from 700 to 2200 picocuries (pCi/l) per liter of air.

Visitors 'self-treat' via a series of visits. A suggested stay includes 30-60 hours, taken incrementally, over 10 to 11 days. Shorter or longer stays are optional. Determining factors may include severity of disease, mobility, energy, level of pain, and time or travel constraints. Repeat therapy as needed. Most visitors report positive results that range from immediate to weeks later, and lasting months to years.

The underground gallery is 85' below surface and accessed by Otis elevator. Amenities include wi-fi, tables, chairs, and heat lamps over padded benches. Flooring is level and dry. Temperature varies from 54°F-62°F. Wear warm, comfortable, casual clothing and footwear.

The radon room, an alternative to going underground, seats 11. Radon-laden air is pumped up from the 105' level of the mine workings, circulated and returned underground. As a courtesy to all, cell phone use is prohibited and all electronics may be used with headphones or ear buds. Rest rooms are located at surface only. Care-givers must be readily available for assistance.

INDICATIONS

Living bodies adapt to stress, whether it be biological, physical, chemical or radiological. Low radiation doses at low dose rates "up-regulates" a body's biological defense and repair mechanisms which include cell protection, and the production of pain relief and other hormones.¹

Utilizing Radon - a naturally occurring element - therapy from 'radium emanation' continues to be recognized worldwide as an effective approach to disease symptom management.

Current paradigm dictates that any exposure implies a negative health effect at any level, however science presents published evidence of quite the opposite.²

Hormesis³ is an adaptive response of living organisms to low levels of chemical, biological or radiological stress or damage. The result is improved fitness.

NOTE The Free Enterprise Radon Health Mine facility is available for persons seeking an alternative or complement to present treatment for pain relief and disease symptom management. We suggest that minor children and pregnant women consult their physician. At this facility 32 hours of radon exposure over a 10 day stay is the equivalent of approximately 6 mSv or 0.6 rads or 0.6 rems or 0.6 Roentgens - just twice the radiation exposure from normally occurring background sources. For further perspective, populations thrive at natural background levels in excess of 260 mSv annually with no adverse effects. Doctor's inquiries are welcome. Supportive technical information is available upon request.

Those suffering conditions of chronic pain due to illness or injury and autoimmune disorders may find this modality effective for - but not limited to - the following:

Arthritis (OA, RA, JRA, etc.)	Prostate (BPH) Scleroderma	Chronic Pain Multiple Sclerosis	Psoriasis & Eczema Ankylosing Spondylitis
Lupus	Emphysema	Fibromyalgia (FMS)	Ulcerative Colitis
Crohn's & IBS	Bursitis & Gout	Migraine Headaches	Bronchitis & Asthma

THE HISTORY

Originally appropriated in 1924 by miners interested in silver-lead ore, the early site of the Free Enterprise Mine was abandoned after producing a few small shipments of ore.

In 1949, mining engineer and geologist Wade V. Lewis, with two other locators, discovered the presence of radioactivity at the abandoned mine dump site. Lease for the Free Enterprise Uranium Mine was acquired and excavation proceeded down to drifts at 85, 105 and 150 feet.

A Los Angeles woman, visiting with her mining husband in the summer of 1951, noticed that her bursitis disappeared after several visits to the underground workings.

Relaying the incidence of benefit, word spread and the stampede began. Pain sufferers demanded access, even while mining continued. Nearly 1,000 people were permitted to visit for observation purposes only.

Reports of pain relief ran so high that the operators were compelled to initiate revision of the Free Enterprise mining operation into the health destination that it is today. Lewis' dedication culminated in a discovery that has benefitted generations since 1952. Management under the ownership of Lewis' great grandson, Ryan Lewis, and his wife, Leah Lewis, continues to this day.

RADON THERAPY

Around the world, thousands of people are treated annually with radon. Virtually every continent is host to naturally occurring sources of radon that may include geothermal hot springs, thorium sand beaches, healing caves or medically applied radon inhalation and water baths.
